

Unix System Administrator

- Fantastic chance to get involved with a diversity of projects
- Complex environment, not for the faint hearted!
- An opportunity to use leadership skills
- One of the largest environments in NZ
- CBD location
- Solid minimum 4 years experience

Become involved in a multi tiered, complex environment that is well respected as an industry leader.

Situated in the CBD this role is an excellent opportunity for an experienced Unix/Linux Administrator to grow within a small team and take on a leadership role. Reporting directly into the Team Lead you must be able to articulate precisely requirements both verbally and written.

To be successful in this company you will need to have the following:

- Relevant 4+ years in an enterprise type environment
- A very high level of Linux/Unix understanding including working with clusters
- Specifically RedHat Linux, although experience with Ubuntu, Solaris, HP, IBM and other operating systems favourable
- Understanding of SQL
- A prerequisite is exceptional written, verbal and listening skills
- Unix/Linux Certification desirable or relevant IT tertiary qualification

This role requires the successful candidate to be innovative and driven with the ability to work in a complex environment, where idea sharing is welcome.

In return the company can offer an exciting, bleeding edge environment with ample room for career advancement. A competitive salary is offered in return for relevant IT experience.
